

**SARS-COV-2 Testing Capabilities
Commercial and Private Laboratories**

The below table lists commercial and private laboratories with SARS-COV-2 testing capabilities known to VDH as of April 14, 2020. This list is intended to inform clinicians on the various commercial labs available to them and does not constitute endorsement by VDH. This list does not include hospital laboratories that are performing SARS-CoV-2 testing. Clinicians should use their judgment to determine if a patient has signs and symptoms compatible with COVID-19 and whether the patient should be tested. Until testing is widely available, prioritizing testing at private labs for high-risk groups should also be considered.

Please refer to laboratory specific information related to ordering, specimen collection, and pricing.

Laboratory Name	Additional Information
Aperiomics	Aperiomics Xplore-COVID-19
Bako Diagnostics	COVID-19 Testing
Excelsior Diagnostics	COVID-19
GENETWORx	COVID-19 Testing
Labcorp	COVID-19 Provider Information
Next Molecular Analytics	Clinical Services
Poplar Healthcare	Healthcare providers and institutions interested in obtaining access to the test can call 901-526-1912 or email covid19@poplarhealthcare.com .
Quest	COVID-19 Information for Healthcare Providers
